

Sivappriya Arasu

Senior Technical Writer · AI-assisted documentation systems

priyapillai2123@gmail.com · +91 93614 06109 · linkedin.com/in/sivappriya · github.com/priya210596 · priya210596.github.io

SUMMARY

Senior Technical Writer with 7+ years across technical writing, content strategy and product marketing. I build scalable documentation systems and AI-augmented content pipelines that improve accuracy, speed up reviews and reduce support load. Strong in docs-as-code (DITA, Git, Markdown) and in Generative AI guardrails.

SKILLS

AI & automation: Claude Code & custom Claude skills · Prompt engineering · AI-augmented documentation workflows · Agentic automation · Generative AI guardrails

Docs-as-code & tooling: DITA XML · OxygenXML · Git & GitHub · Markdown · Python

Content strategy: Information architecture · Content strategy · Knowledge management · Style guide development · Stakeholder management

EXPERIENCE

Senior Technical Writer · ServiceNow

Mar 2025 – Present

- Owned documentation strategy within the Telecommunications Network Inventory (TNI) and Data Center Network Asset Management (DCNAM) product areas, aligning content development with product roadmaps, prioritizing launches, and translating business goals into customer-ready content solutions for global telecom and data center operators.
- Produced user guides, conceptual overviews, implementation guides, API documentation, integration manuals, and release notes across multiple release cycles, alternating fluidly between content creation, editing, copy-editing, and proofreading tasks.
- Collaborated with product designers to craft accessible, inclusive UX copy for complex product workflows, strengthening overall product usability and customer experience.
- Partnered with analytics and AI teams to map user intent to content solutions and translate business requirements into precise AI prompts; monitored model behavior and applied Generative AI guardrails—identifying and mitigating risks like hallucinations and grounding issues to ensure reliable, accurate AI-driven experiences.
- Proactively identified process improvements, documentation design enhancements, and roadblocks to content development—collaborating with teammates to design, prototype, and implement solutions across distributed teams.
- Identified and championed opportunities to apply AI tooling to improve documentation efficiency and quality, partnering with cross-functional teams to evaluate, adopt, and operationalize new workflows.
- Built custom Claude skills for documentation automation, such as a content gap analyzer that combines style guide, DITA structure, and staging-drift checks to produce downloadable gap reports for writers.
- Owned content architecture and governance—Git workflow optimization, repository management, OxygenXML/Positron configuration, DITA architecture refinement, style guide enforcement, and accessibility compliance across distributed content teams.
- Managed a weekly work queue of documentation requests, integrating content strategy with product and engineering roadmaps, prioritizing tasks based on business impact and time-sensitive release schedules, and identifying and mitigating delivery risks while reporting status to stakeholders.
- Ran content quality checks across the documentation portfolio, tracking gaps, adoption readiness, and support case trends tied to release milestones to measure documentation impact.
- Developed high-quality content solutions (text, videos, interactive multimedia) for top user issues and customer journeys; engaged cross-functional forums to integrate content strategy with broader product initiatives, audited outdated content, and ensured consistent quality across global teams (Bangalore, US, APAC).

Product Communication Specialist · Floship

Mar 2023 – 2025

- Built and led the customer education program, contributing to a 35–40% increase in prospect-to-customer conversion and measurable ARR retention.
- Focused on creating durable systems—skills taxonomies, certification frameworks, content architectures—rather than one-off training assets.
- Designed modular content architecture allowing adaptation across delivery formats (instructor-led, self-paced, assessment) from shared source materials.

- Designed and launched a knowledge base from the ground up, defining content structure, taxonomy, and governance to enable scalable knowledge management.
- Created article style guide and enforced consistent standards across all new and updated documentation, building a repeatable user experience.
- Streamlined operational workflow processes, proactively investigated workflows, and collaborated with SMEs across diverse partner teams to ensure accuracy across the knowledge base.
- Delivered product tours, webinars, and training content, including YouTube feature and how-to videos, while analyzing churn metrics to refine engagement strategies.
- Mentored junior team members and reviewed peer content to ensure quality, timely delivery, and early defect identification.

Technical Writer · Zoho Corporation — Mar 2019 – Oct 2023

- Defined, designed, and delivered end-to-end product documentation for internal and external stakeholders—user manuals, how-to guides, admin content, and developer resources—managing multiple agile projects of varying complexity in parallel.
- Zoho Cliq Community Manager: Managed the Zoho Cliq user community by publishing product launch announcements and "What's New" updates, engaging users, responding within SLA, gathering feature requirements, and collaborating with developers and product managers.
- Investigated and tracked product bugs for enterprise clients, troubleshooting issues, escalating appropriately, ensuring quick resolution with engineering teams, and documenting recurring client pain points that informed help documentation and in-product messaging to reduce case inflow.
- Led content development for video and product marketing assets, partnering with design teams to conceptualize storyboards and translate complex product ideas into compelling visual storytelling.
- Conducted monthly product webinars, analyzed content performance to reduce support tickets and improve user retention, and contributed to UX copy.

Technical Content Writer (Intern) · AdminDroid — Jan 2019

- Authored technical blogs and product articles on Microsoft 365 administration and security, building foundational expertise in technical writing for IT audiences.

KEY ACHIEVEMENTS

- **Architected an AI-augmented documentation review system using Claude Code + Git (ServiceNow).** Automated technical accuracy validation against source repositories, reducing peer-review cycles by 30%, accelerating technical accuracy validation by 40%, and improving content quality consistency by 20% at scale.
- **Built a human-in-the-loop documentation pipeline (ServiceNow).** Takes a work item from ticket to a drafted topic in Oxygen with every step automated and a person approving each decision; review time reduced by 80%.
- **Developed a gap analysis methodology across implementation stories (ServiceNow).** Identified critical coverage gaps, elevated documentation priorities, and prevented release-related content blockers across multiple product launches.
- **Improved content discoverability and customer self-service across TNI documentation (ServiceNow).** Restructured information architecture and applied AI-driven content optimization, resulting in a 25%+ increase in page views and stronger search retrieval performance.
- **Delivered comprehensive documentation for Zoho Cliq 3.0.** Collaborated with the support team to identify user pain points and created targeted documentation that resulted in a 60% reduction in support tickets, significantly improving user self-sufficiency.
- **Drove user adoption through community content and webinars (Zoho Cliq).** Created a community post on the Remote Work Module that drove significant feature adoption; conducted onboarding webinars that boosted retention rates; was featured in a Zoho Networks client-acquisition video; and hosted partner training sessions that improved documentation.

WORK SAMPLES

User guides: ServiceNow Telecommunications Network Inventory · ServiceNow Enterprise Asset Management for Data Center and Network Asset Management (DCNAM) · Zoho Cliq user guides

Developer, admin & integration guides: Zoho Cliq developer guide · Zoho Cliq admin guide · Zoho Cliq integration guide

Technical blogs: Introduction to Security Defaults · 10 Cliq integrations to simplify your workflow

Videos & webinars (conceptualization, content, voice-over): Zoho Cliq 3.0 feature video · CliqNetworks webinar

EDUCATION

Bachelor of Information Technology · Sona College of Technology · 2021
